Introduction

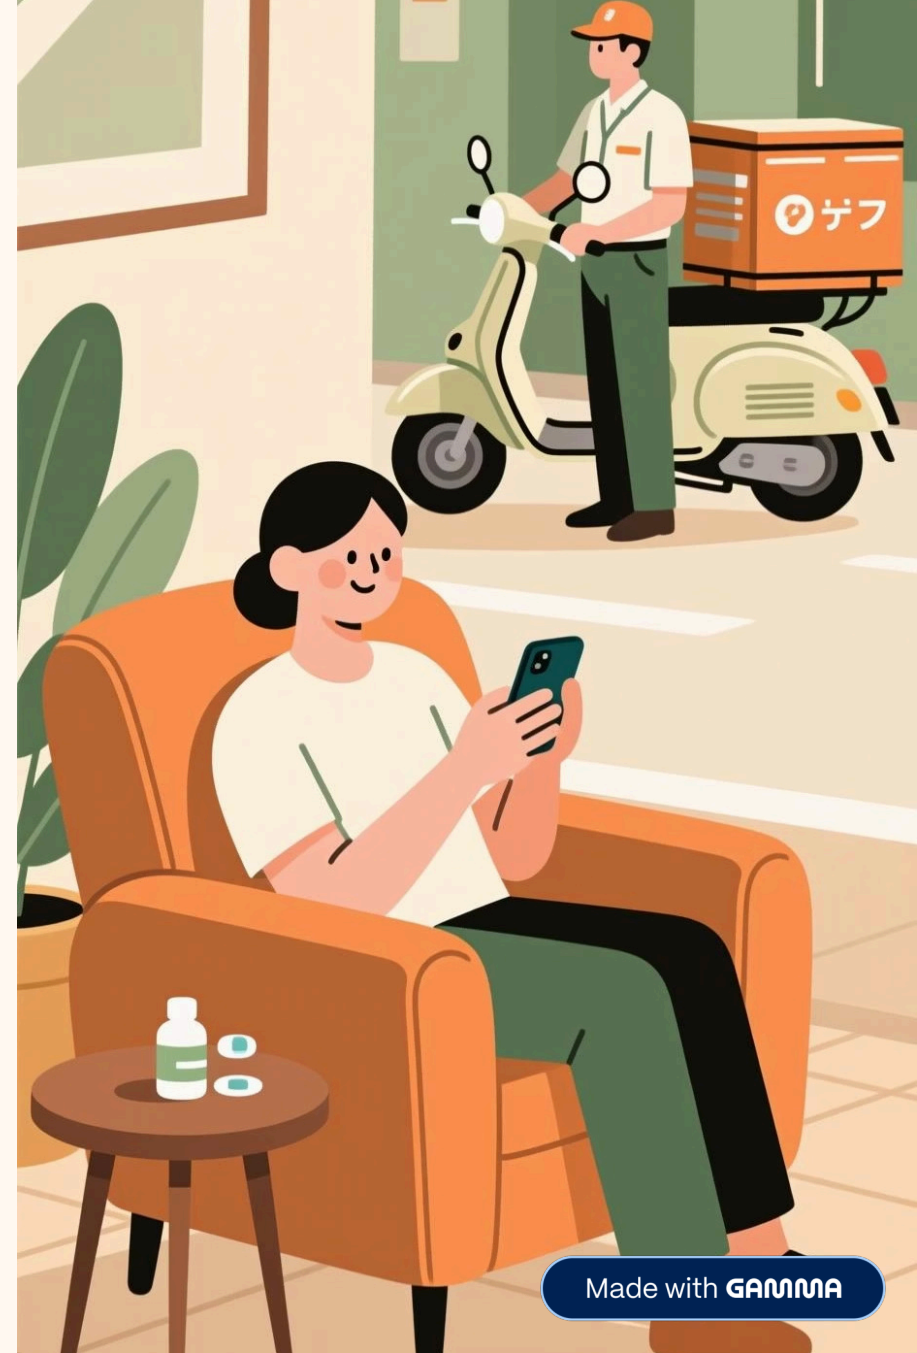

A medicine Delivery App allows users to order medicines online.

Users can select medicines from a list.

Medicines are delivered to the user's home.

Problem Statement

Visiting medical stores is difficult during emergencies.

Elderly and sick people face difficulty in traveling.

Long waiting time in medical shops.

Our Solution: Bringing Healthcare Closer

Our innovative medicine delivery app is designed to overcome these challenges, providing a reliable solution for all your medication needs.

- An easy to use medicine ordering app.
- User can search and select medicines.
- Medicines are delivered quickly to the doorstep.

Basic Features of the App

User Login

Secure and easy login/registration for personalised experience.

Medicine Search

Advanced search functionality to find medicines quickly.

Add to Cart

Simple process to add selected items to the shopping cart.

Order Placement

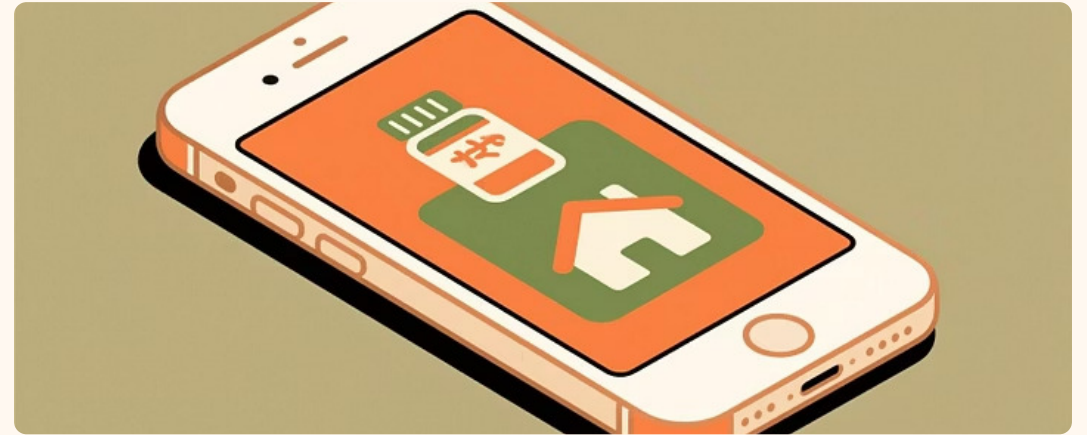

Streamlined checkout and order confirmation process.

Home Delivery

Reliable and timely delivery directly to the user's address.

Conclusion: Transforming Healthcare Access

Saves Time and Effort.

Provide convenient access
to medicines.

Helpful for all users
especially patients.
